

Response of the Higher Education Funding Council for Wales to the Final Report of the Research Support Libraries Group

The Higher Education Funding Council for Wales (HEFCW) considered the final report of the Research Support Libraries Group at its meeting on 9 May 2003.

The Council endorsed in principle the recommendation to establish a UK-wide Research Libraries Network to lead and co-ordinate the provision of research information, but agreed that further work should be undertaken on a number of aspects of the proposal. It will reconsider the proposal in the light of the outcomes of that further work.
